

DUSTEX® B3 Vacuum

The DUSTEX® B3 Vacuum is a powerful triple-motor vacuum with an automatic filter-cleaning system, designed to collect high volumes of dust quickly.

Incorporating the Longopac Bag System, collected dust can be easily disposed of without risk of the operator coming into contact with the dust. It's 50mm intake allows it to perform two separate functions:

- Standard Vacuum Cleaning, using a floor cleaning wand to collect settled dust or debris
- On-tool Extraction for capturing high levels of dust produced by large equipment, such as scabblers.

With high suction performance, the B3 will easily collect high volumes of dust and debris.

Features & Benefits

- ✓ H Class Filtration
- ✓ Powerful suction from a triple motor
- ✓ Automatic filter cleaning
- ✓ Anti-static
- ✓ 110v 32a

Key Applications

- ✓ Construction Dust
- ✓ Deep Cleaning
- ✓ Bulk dust from machinery Industrial
