

DUSTEX® Downdraft Bench

Suitable for controlling hazardous dust and fume, the DUSTEX® Downdraft Bench is a completely stand-alone unit that can provide full extraction from activities such as welding or grinding.

This bench can be used with a range of different fans and filter units* to achieve effective extraction for multiple applications. It is fitted with a 200mm duct connection. The 4" wheels provide great portability and allow the unit to be easily relocated within the work area. Additionally, the sides of the bench can be adjusted, creating a wider stable surface, allowing you to comfortably work on larger pieces of material.

Features & Benefits
