

DUSTEX® Mobile Containment Unit

DUSTEX® Mobile Containment Unit is designed to provide mobile dust and debris containment during maintenance in controlled and sterile environments such as hospitals, cleanrooms and laboratories and offers huge cost savings compared to traditional dust control methods such as plastic sheeting or hardboard arrangements.

The unit is a targeted single application solution for containing ceiling and ceiling cavity penetrating activities during construction or maintenance. Easily assembled the Dustex Mobile Containment Unit is more effective and easier to use than plastic sheeting and pole type solutions.

Greater efficiency and lower long run material costs make it a more economical choice that is easy to clean with standard disinfectants. Due to its lightweight aluminium frame, the unit is easy to store and transport.

Features & Benefits

- ✓ Reduced maintenance costs
- ✓ Easy to assemble
- ✓ Easily moved from location to location
- ✓ Standard unit accommodates a 6ft high ladder
- ✓ With the application of an extension piece, the unit can accommodate an 8ft high ladder.

Key Applications

- ✓ Removing ceiling tiles to access piping, cabling, HVAC etc
- ✓ Replacing ceiling tiles or light bulbs in ceilings
- ✓ Pre-work surveying
- ✓ Demolition & construction projects

The DUSTEX® Mobile Containment Unit can be used with the Dustex Raptor filtration unit

*If you require a larger unit, please contact us on 0808 178 3286 to discuss your requirements.
